1. Introduction

1.1 Purpose

This document describes the new functionality developed for Analytics for ECM 10.0.20.1 for Dynamics 365 Finance and Operations 10.0.20 and above.

The purpose of this release is:

Topic	Yes/ No	Remarks
New Product Launch	Yes	Analytics for Engineering Change Management
New features	No	
New D365 functional topics considerations	No	
Bug fixes	No	

1.2 Audience

The audience for this document is certified partners selling and implementing as well as customers who have bought the solution

1.3 Release information

Newly Released “Analytics for Engineering Change Management (ECM)” package is a part of TI’s Business Analytics Suite (BAS). With “Analytics for ECM”, you will be able to optimize business decisions around engineering change with strategic and tactical insights at your fingertips. Interested? Continue to read further.

The solution enables end-to-end analytics right from business logic to data preparation to visualization, so that users can exclusively focus on decision making from insights and not setup and maintenance. With our Data Modeling Studio embedded inside the solution, the setup for data preparation is inbuilt, while the pre-built dashboards in Power BI enable easy use and distribution.

2. What's New

Analytics for Engineering Change Management (to-increase.com) is an end-to-end packaged solution that transforms raw data into meaningful insights, enabling smart decisions.

Owing to growing business complexities and market changes, analytics is crucial to stay ahead in the race, especially in the dynamic ECM world. We have, therefore, come up with an all-inclusive analytics solution to help optimize engineering change from start to end, right from data preparation to visualization. This offers simple, pre-built, plug-and-play and end-to-end enabled analytics to maximize business value for organizations by enabling better business-critical decision-making. To leverage our analytics package, organizations should currently be using Microsoft's Engineering Change Management.

With industry-leading metrics at your fingertips, get ready to enable end-to-end analytics effortlessly.

2.1 Benefits

- ✓ Optimize engineering change
- ✓ Respond to shrinking product lifecycles
- ✓ Reduce product complexity
- ✓ Improve order fulfilment rate
- ✓ Optimize product portfolio
- ✓ Create a data-driven organization

2.2 Key Features

- ✓ Enables end-to-end analytics
- ✓ Provides both strategic and operational insights
- ✓ Reduces dependency on IT and engineering teams
- ✓ Reduces time to achieve analytics

Disclaimer:

Microsoft is continuously adding new features in the application directly and via Feature Management. Sometimes these are public preview and will be made generally available in future releases, in other cases, they are already general available, and you have the choice to activate them. Currently, we are not testing compatibility with all new features or combinations. Once a feature is enabled at the customer environment and in case of any issues or questions related to new standard features and our solutions, kindly contact us via To-Increase support.

6. Discontinued features

Below is the list of features which will be discontinued in future release.
