1. Introduction

1.1 Purpose

This document highlights new features and enhancements that are introduced within the Anywhere Mobility Studio Solutions (for Microsoft Dynamics 365 Finance & Operations). This release is compatible with the most recent version of Dynamics 365 for Finance and Supply Chain Management.
The portal changes are also described in this document. It is not mandatory that there are new portal changes in every release.

1.2 Audience

This document is intended for new or current Anywhere Mobility partners and customers.
Core/basic knowledge of Microsoft Dynamics 365 and prior versions of Anywhere Mobility Studio is required.

1.3 Deliverables

Anywhere Mobility Studio is released with the following for the Microsoft Dynamics 365 for Finance and Supply Chain Management environments:

Staedean Build Number	Staedean Solution version	Compatible MS Version	Remarks
10.0.42.31	31	10.0.39	Release – January 2025

Note: previous versions are published in the TI (To-Increase) version, the last version was 10.0.41.30 (July version). From this version onwards, all release notes are published as Staedean Release notes.

Product	Version
Anywhere Mobility Studio & **Anywhere for Logistics for Dynamics 365 for Finance and Supply Chain management &** **Anywhere for Retail for Dynamics 365 for Finance and Supply Chain management &** **Anywhere for Production control for Dynamics 365 for Finance and Supply Chain management**	January 2025 Release, version 10.0.42.31

Deliverable	Description
Solution package **(important for customers and partners)**	Anywhere Mobility Studio, Anywhere for Logistics, Anywhere for Retail and Anywhere for Production control is delivered as a Microsoft Dynamics Lifecycle Services (LCS) solution package. The installer file can be downloaded from the release notes software folder (LCS). Run the Application configuration update: Path: Anywhere Mobility Management > Parameters > Automatic Update • Ensure that the update checkbox is ticked before updating the applications to the newest Anywhere release (10.0.42.31) No manual configuration files need to be updated.
DAW Portal **(important for customers and partners)**	**Important**: New portal changes are introduced in this release. • Ensure that you download and install the new portal after you have installed the latest Anywhere release to F&O (see Solution package ab above).
Release notes	This document describes any new features or solved bugs within the following solutions: • Anywhere Mobility Studio • Anywhere for Logistics • Anywhere for Retail • Anywhere for Production Control Note: Anywhere for Rental has its own release notes.
Regression testing logbook **(for internal stakeholders)**	This document can be found on the Anywhere project (via Teams): TI ANY > General > Deployments > Release 10.0.42.31 > Documentation

N/A

Feature	Notes

4.   Disclaimer

Microsoft is continuously adding new features to the application directly and via Feature Management. In some scenarios these are public previews and will be made generally available in future releases, in other cases, they are already available, and you have the choice to activate them. Currently, we are not testing compatibility with all new Microsoft features or combinations. Once a Microsoft feature is enabled in the customer environment and in case of any issues or questions related to new standard features and our solutions, kindly contact us via Staedean support.
