2.1.1 Production control issues – Unit conversion on BOM lines on portal

This fix is for a post release defect (bug 148219 in August release 10.0.27.21). There was still an issue with converting from Stocking unit to BOM units. It is populating multiple lines with the same qty 'Avail Phy' (example screen print 1). However if this item is removed from the BOM lines and is re-estimated, the qty 'Avail Phy' is populated correctly.

BOM LINES									
ITEM	PRODUCT NAME	VARIANT	WRH	ESTIM	AVAIL PHY	RELEASED QTY	REMAINING QTY	FLUSHING	CHECK-OFF
● S045408	M&S Red Fat Coleslaw UpGrade Rev.B 2016		F1CSPack	1,012.50	0.00	0.00	1,012.50	Finish	No

Screen print 1

The developer created a change to fix this issue whereby BOM unit qty is not duplicated anymore.

2.1.2 Production control issues – Populate batch items in picklist

There were issues with not updating the picking list line with batch nr. in D365FO.

An extra line was added in case of scanning batch nr. not on pickling list line or scanning other batch nr. than on picking list line.

The developer has created a change in which the picking list line (in case of single line) in D365FO is populated or in case of multiple lines the picking list line in D365FO from which the batch nr. is scanned (screen prints)
