Title	Anywhere Mobility Studio for Dynamics 365 for Finance and Supply Chain Management
Subtitle (Subject)	Release Notes
Solution Suite	Anywhere Mobility Studio & Anywhere for Logistics & Anywhere for Retail & Anywhere for Production control
Category	Release Notes
Author	Mobility Team
Published Date	12/1/2021
Status	Draft
Comments	Version 1.0.0.0

1.   Introduction

1.1   Purpose

This document highlights new features and enhancements that ship with **Anywhere Mobility Studio for Dynamics 365 for Finance and Supply Chain Management** release from To-Increase. This release is compatible with the most recent version of Dynamics 365 for Finance and Supply Chain Management.

1.2   Audience

This document is intended for new or current Anywhere Mobility partners and customers. Some knowledge of the new Microsoft Dynamics AX and prior versions of Anywhere Mobility for Microsoft Dynamics AX 2012 is assumed

1.3   Deliverables

Anywhere Mobility Studio is released on the following Microsoft Dynamics 365 for Finance and Supply Chain Management Build.

TI Build Number	TI Solution version	MS Version	Remarks
10.0.22.17	1	10.0.22	December 2021 monthly update

Product	Version
Anywhere Mobility Studio & **Anywhere for Logistics for Dynamics 365 for Finance and Supply Chain management &** **Anywhere for Retail for Dynamics 365 for Finance and Supply Chain management &** **Anywhere for Production control for Dynamics 365 for Finance and Supply Chain management**	December 2021 Release, version 10.0.22.17

Deliverable	Description

Solution package	Anywhere Mobility Studio, Anywhere for Logistics, Anywhere for Retail and Anywhere for Production control is delivered as a Microsoft Dynamics Lifecycle Services (LCS) solution package.
Release notes	This document is provided with Anywhere Mobility Studio, Anywhere for Logistics, Anywhere for Retail and Anywhere for Production control
Implementation methodology	The solution package contains an Anywhere Mobility Studio and Anywhere for Logistics, Anywhere for Retail and Anywhere for Production control *implementation methodology* that provides detailed step-by-step instructions on how to install, learn, and implement Anywhere Mobility Studio, Anywhere, Logistics and Anywhere for Retail and Anywhere for Production control
Getting started BPM library	The solution package includes a *Getting started with the Anywhere Mobility Studio* BPM library. This library contains a number of task guides that showcase some of the key capabilities of Anywhere Mobility Studio.
Documentation BPM library	The solution package includes an *Anywhere Mobility Studio documentation* BPM library and *Anywhere for logistics, Anywhere for Retail and Anywhere for Production control* documentation library. This library contains a comprehensive set of task guides that document how to use *Anywhere Mobility Studio* for your BPM activities. This documentation is provided in U.S. English only.
Process data packages	The solution package provides a simple *Anywhere Mobility Studio demo* process data package that can help you get started from LCS. Besides that, it also provides data packages for Anywhere for Logistics, Anywhere for Retail and Anywhere for Production control
Marketing assets	A To-Increase security certificate is provided to allow trusted installation of the provided model files and ISV license files.

2. What's New

2.1 Release of new application – **Anywhere for Production control**

We at TI are proud to announce, that our brand-new application ANYWHERE FOR PRODUCTION CONTROL is now officially available.

The solution is meant to be deployed on the shopfloor and be used by the production workers. It is specifically designed to provided best user experience when used on larger touch screens.

The application is based on Production orders. It has a landing screen, which displays relevant list of orders with sufficient information like:

- Started date and expected delivery date
- Current status
- Started qty
- RAF remainder qty
- etc

REFRESH   INFO DOC BOM PAUSE/RE   START PICK RETURN RAF

BACK | LOG OFF

From this screen user can take 2 types of actions

- Review relevant and helpful information, like
  - BOM details
  - Documentation, attached to the BOM/Formula version, Route version or the order itself
  - And more

- Update the production orders, like
    - Start order
    - Pause/restart order
    - Pick
    - Return materials to warehouse
    - RAF

In the Release notes you can find complete User manual for the application.

2.2   Anywhere for Logistics – new process **Inventory movement**

Anywhere for Logistics in now having a new process. **Inventory movement** allows the warehouse workers to correct inventory in the warehouse and categorize this in for example stolen, damaged, expired and so on by selecting a dedicating journal template (name). Each template will create financial transactions against a specific offset account, contradictory to Inventory adjustment functionality, which is using only the profit/loss account (the same which is used for counting).

Inventory movement is included in the Logistics Advanced license tier.

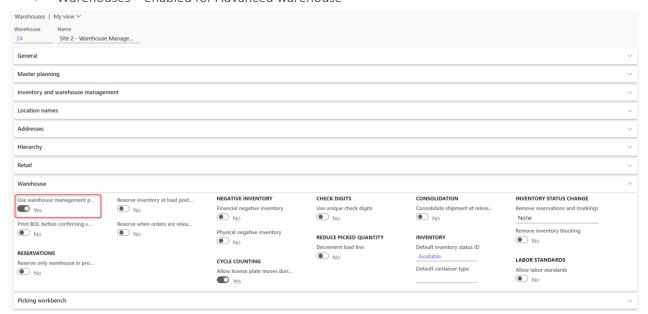

2.3   Anywhere for Retail – support for WHS-enables items and warehouses

Now it is possible to use all Retail processes together with some Advanced warehouse settings:
- Items – enabled for Advanced warehouse

- Warehouses – enabled for Advanced warehouse

Anywhere for Retails is still using only the WMS1 functionalities, but will now completely support the above-mentioned settings, which was not possible so far.

Some limitations and setting must be observed though

- The default location, which is used in all processes, must be setup on the warehouse master, tab Retail, Default retail location (previously it was the default issue location)
- License plates cannot be used
- You cannot use locations with activated License plate tracking
- Inventory status will be defaulted from standard settings, and there are no forms in Anywhere for Retail where you can select it

2.4   Other updates

ID	Product	Title
127855	Anywhere for Logistics	Logistics Receipt journal - Best before date must be less than or equal to expiry date. Batches could not be updated.
128323	Anywhere for Retail	Retail Receipt journal - cannot copy the process
129158	Anywhere for Logistics	Logistics production - Use GTIN parameter not working
131778	Anywhere for Logistics	Logistics Transfer - Financial dimensions not populated
131779	Anywhere for Logistics	Logistics transfer journal - Validation failure "Item has multiple destination locations"
133239	Anywhere for Retail	Retail Item info - Several Font awesome icons not displayed
133360	Mobility studio	Mobility studio - Configurable query - Remove Computed column from configurable queries
134203	Anywhere for Retail	Retail - Movement journal - Worker field not populated when the journal is created
134783	Mobility studio	Create journal lines test action not working

3.   Known Issues

ID	Product	Title
124868	Anywhere for Logistics	CS00165314 | TI ANYWHERE - Subcontracting process for large BOM
125438	Mobility studio	Chart control - missing inputs
135314	Anywhere for Retail	CS00192262 | Retail - Store Transfer Process: Creating Line in Transfer Order gives Error

3.   Known Issues

4. Changed or deprecated features

Feature	Notes

5.   Disclaimer

Microsoft is continuously adding new features in the application directly and via Feature Management. Sometimes these are public preview and will be made generally available in future releases, in other cases, they are already general available, and you have the choice to activate them. Currently, we are not testing compatibility with all new features or combinations. Once a feature is enabled at the customer environment and in case of any issues or questions related to new standard features and our solutions, kindly contact us via To-Increase support.
