| Deliverable	Description
Solution package	Anywhere Mobility Studio, Anywhere for Logistics, Anywhere for Retail and Anywhere for Production control is delivered as a Microsoft Dynamics Lifecycle Services (LCS) solution package.
Release notes	This document is provided with Anywhere Mobility Studio, Anywhere for Logistics, Anywhere for Retail and Anywhere for Production control
Implementation methodology	The solution package contains an Anywhere Mobility Studio and Anywhere for Logistics, Anywhere for Retail and Anywhere for Production control *implementation methodology* that provides detailed step-by-step instructions on how to install, learn, and implement Anywhere Mobility Studio, Anywhere, Logistics and Anywhere for Retail and Anywhere for Production control
Getting started BPM library	The solution package includes a *Getting started with the Anywhere Mobility Studio* BPM library. This library contains a number of task guides that showcase some of the key capabilities of Anywhere Mobility Studio.
Documentation BPM library	The solution package includes an *Anywhere Mobility Studio documentation* BPM library and *Anywhere for logistics, Anywhere for Retail and Anywhere for Production control* documentation library. This library contains a comprehensive set of task guides that document how to use *Anywhere Mobility Studio* for your BPM activities. This documentation is provided in U.S. English only.
Process data packages	The solution package provides a simple *Anywhere Mobility Studio demo* process data package that can help you get started from LCS. Besides that, it also provides data packages for Anywhere for Logistics, Anywhere for Retail and Anywhere for Production control
Marketing assets	A To-Increase security certificate is provided to allow trusted installation of the provided model files and ISV license files.

2.   What's New

2.1   Mobility studio bug fix

ID	Product	Title
138801	Mobility studio. Anywhere for Logistics. Anywhere for Retail. Anywhere for ProdCtrl.	CS00203428 | Error occurs when using test website on 10.0.22.17 for D365F&O 10.0.23

This bug affects the cache functionality. Because of it, none of the applications was possible to be used with cache.

When the cache for a menu is published, it will receive a marking, that it was successful.

However, when any DAW application is started with a user, for which Runtime mode = Cache, the portal would give an error "Invalid range" in every process.

The bug is not affecting users which are set to Runtime mode = Configuration

This is fixed by a code change only. No changes have been done to configurations.

For customers, who are still running DAW version below 10.0.22.17, it is recommended to install out latest version 10.0.22.18 and do not install 10.0.22.17

For customer, which are running DAW version 10.0.22.17, it is recommended to install 10.0.22.18. Only the code should be refreshed, there is no need to update the DAW libraries and configuration. After deploying 10.0.22.18, please rebuild the cache

2.2   Other updates

ID	Product	Title

3. Known Issues

ID	Product	Title
135314	Anywhere for Retail	CS00192262 | Retail - Store Transfer Process: Creating Line in Transfer Order gives Error
137868	Anywhere for Logistics	Logistics counting - List open journals is not filtered by journal name
138474	Anywhere for Logistics	Logistics Transfer - Issues with "Use GTIN unit"
138595	Mobility studio	Anywhere app parameters - set default barcode separator value to "."
138603	Anywhere for Logistics	Logistics Cycle Count - issues with "Use GTIN unit"
138795	Mobility studio	Check Cache functionality always ends failing
138797	Mobility studio	Duplicate relations in configurable queries

139340	Anywhere for Logistics	Production receipt - Wrong navigation for Autoserialized items

4. Changed or deprecated features

Feature	Notes

5.   Disclaimer

Microsoft is continuously adding new features in the application directly and via Feature Management. Sometimes these are public preview and will be made generally available in future releases, in other cases, they are already general available, and you have the choice to activate them. Currently, we are not testing compatibility with all new features or combinations. Once a feature is enabled at the customer environment and in case of any issues or questions related to new standard features and our solutions, kindly contact us via To-Increase support.
